Compressor is a compressor plugin that can be used for processing sounds that require dynamic processing. Use the side-chain feature to process only certain frequencies, leaving the other frequencies unprocessed. And last but not least, with the M/S feature, you can process dynamically only the Mid, the Sides or even achieve the famous NY parallel compression (50/50) but in M/S! We decided to change the name of this plugin because many people don't know it as Compressor and the name we chose fits much better for us. Please install this plugin even if you already have Compressor! If you don't have Compressor, it can be found in our Plugins library. You will find it here: 1.5 11/27/2016 * Bug Fixed: 1.4 09/15/2016 * Bug Fixed: 1.3 01/12/2016 * Bug Fixed: 1.2 11/27/2015 * Bug Fixed: 1.1 11/13/2015 * Bug Fixed: 1.0 10/23/2015 * Initial Release About KMACro KMACro is a very powerfull Kontakt instrument, it features a unique "Active Side chain" engine and powerful and flexible modulation (MIDI, Sends etc) options. Its Kontakt 5.6 or above compatible. MACRO stands for Modulator/Expander/Compressor/Envelope. The plugin can handle any modulation scheme you need, from discrete modulation to the full flexibility of the Kontakt Envelopes. The Active Side chain engine allows you to easily modify the desired side-chain information in one go, with a maximum number of channels for modulations of 8. You can use it for modulation of multiple channels, each channel can be connected to a MIDI CC or Sends and much more. Each individual modulation has their own Channel and its own envelope with independent options. There is also the ability to export all modulation data to MIDI or Kontakt save format files. When an envelope is selected, the plugin will automatically perform a dynamic compression as the dynamic range of the side chain is 81e310abfb
