- Calculate the calories that are local.
- Calculate the calories that were made in the country or in the region.
- Calculate the calories that are made in the country

What's New In?

This is the accurate formula for calculating the basal metabolic rate (BMR). A new formula for the BMR has been developed to take into account more variables than before. It is more accurate because it takes into account the factors that increase the basal metabolism rate. It recognizes and takes into account the following variables:

- Body weight and fat stores of the body.
- Fat free mass and its stores.
- Age. The BMR works on the age factor and calculates it on an exponential function using a reference of 1 when the individual is 18 years old.
- Why should I need the Body Mass Index? The body mass index (BMI) is an index to measure the size and fat percentage of the body. The BMR is directly correlated with the BMI. The more fatty you are the higher your metabolic rate.
- What are the benefits of using this

program? The BMR calculator has many functions and can be easily used in three different ways: - For the individuals that are interested in knowing their daily energy expenditure and activity level. - As a way to evaluate if you are classified as a healthy or a pathologic weight loss or gain. - As a way to calculate your ideal weight. - Accuracy:- The BMR calculation is performed on the basis of worldwide scientific studies, it has been tested in over 100,000,000 people for accuracy. - Usage:- The BMR calculator can be used to calculate your BMR, your maximum daily energy expenditure (DEE) and your daily caloric needs. - Compatible with Windows XP, Windows Vista, Windows 7 and Windows 8, compatible with all modern operating systems. - Error correction in case of invalid or incomplete data entry. - Doesn't reset itself each time the app is launched. - No settings to set and you don't need to be connected to the Internet in order to use it. - No display ads nor links to third parties and it does not install any software that it does not need. - BMR calculator doesn't come with any ads, links to third party apps or any type of software that you are not 100% sure that you want to have installed on your smartphone. - No nagging or force uninstall applications on your device. - No tracking of data or usage nor advertising. - No risk of malware or spyware. - No force uninstall or remove after use. - BMR calculator was developed for the sole purpose of assisting you in your
